Temporary Parcels:

In the Accela system temporary parcels can be created by ePermitting staff or by the Agency directly, and can then be used for work being done where a permanent or numbered parcel is not applicable. Some examples of this is for work being done in the Right-of-way, Code Enforcement cases where no parcel would apply such as transient, illegal camping, graffiti, etc, or the parcel is simply unknown at the time of application intake. A temp parcel could also be used to flag a record for tracking purposes of 'assets' such as bridges, statues/fountains, fire hydrants, bus stops, etc. More than one temporary parcel can be applied to a single record, i.e. a complaint included both Graffiti and Transient, both temp parcels could be associated. Using temp parcels gives agencies the ability to search by the temp parcel name and see a list of all records that are associated to said parcel – Reference Data: Parcel > Associated Record List.

It's helpful to consider the purpose/use of the temp parcels created prior to creating them, so they can be named in a meaningful way, i.e. creating one temp parcel called ROW versus creating 3 temp parcels called ROW – UTILITIES, ROW – CONSTRUCTION, ROW – EVENT, etc., an agency could quickly and easily see how many records were in the differing types of right-of-way versus having to go thru a long list of all records associated to just a generically named temp parcel like ROW.

Example of Temporary Parcels

Code Enforcement (Planning Investigation):

- CE ROW – GRAFFITI
- CE ROW – HABITATION
- CE ROW – SOLID WASTE
- CE ROW – TRANSIENT
- PARKING
- TRANSIENT
- TEMP PARCEL

Planning:

- CITY WIDE (example: Amendment to Development Code)

Public Works:

- ROW
- ROW – GENERAL
- ROW – VARIOUS
- ROW – COASTCOM
- ROW – COMCAST
- ROW – EVENT
- ROW – FRONTIER
- ROW – MWL
- ROW – NW NATURAL
- ROW – ONLINE NW
- ROW – UTILITIES

- ROW – WAVE BROADBAND
- ROW – FIRE HYDRANT
- ROW – TRAFFIC SIGNAL

Building:

- TEMP PARCEL
- NEW DWELLING
